

Standard Operating Guidelines
FIRE BUREAU DUTY & RESPONSIBILITY

Guideline # 230.00

Date: 5/ 1/12 R

PURPOSE

1. To secure the corrections of common fires hazards and identify other violations of applicable codes and ordinances through the inspection efforts of Fire District personnel.
2. To provide a means of familiarization of fire district personnel with the various properties located within Fire District 1 * 2 * 3.
3. The fire safety bureau, in the organizational plan in the fire service directs most of its attention toward the entire range of inspection activity and the enforcement of fire ordinances as well as fire safety education.
4. Fire safety education is designed to develop or change the attitudes and behavior of men, women and children towards fire. It encompasses a wide spectrum of programs and activities directed towards such diverse audiences as school children, senior citizens, homeowners, preschoolers, apartment dwellers, handicapped people, employees, hospital and nursing home staffs, church and civic organizations
5. To communicate to the public through various media resources using accurate information concerning fire incidents and fire prevention education. To open a dialog between the community and its Fire Department. To act as a central clearing point for the dissemination of information, reducing the risk of receiving conflicting information from multiple sources

OBJECTIVE

1. Code enforcement is one of the major areas of responsibility for the fire department and bureau. Fire officials and inspectors are given the legal authority and responsibility to establish and maintain fire and life safety throughout the fire district. Ultimately the citizens depend on the fire department/bureau to ensure they are protected against the dangers of fire, panic, explosions and other hazardous conditions and there resulting effects that may occur within their fire district.
2. Fire prevention inspections are the single most important non fire fighting activity performed by the fire service. A well planned fire safety and inspection program, executed by well trained individuals, can prevent many fires. For too many years, the degree of cooperation and consideration that the fire service has received has been based on its failures instead of its successes. Fires do not just happen, they are nearly always caused by an unsafe act or condition. Thus, practically every fire could have been prevented by eliminating the acts or conditions which contribute to the cause of the fire.
3. The main objective of fire safety education is to increase awareness of human actions that could lead to fires and to develop skills and knowledge to prevent fire or to minimize exposures in the case of fire. Educational programs help to obtain the cooperation of the citizens served by the fire department.

SCOPE

1. The Board of Fire Commissioners have an overwhelming responsibility, not only for fire suppression, but also fire prevention through code enforcement and education. This would in turn lead to fire safety and hazard awareness of businesses educating and alerting the firefighters who suppress these fires and also at the same time are educating the public in fire safety in various fire prevention programs.
2. Fire prevention and education, in cooperation with other agencies, is responsible for developing and conducting a continuing public education program which is aimed at maintaining a high level of fire safety consciousness and promoting public relations. It should provide a year round exposure of fire prevention practices, essentially establishing numerous and various programs to be presented to the public. The basic concept is to increase the scope and influence of the overall fire prevention program through the involvement and commitment of as many individuals as possible.

POLICY

1. The policy of the Fire Bureau is to conduct fire prevention maintenance inspections of occupancies in Fire District 1 * 2 * 3 at least once per year with the exception of one and two family residential occupancies.
2. Fire Department personnel shall be actively engaged in the fire safety inspection program.
3. Fire Department personnel participating in fire safety inspections shall make every attempt to become a certified Fire Inspector of the State of New Jersey and continue education classes to keep the certification valid.
4. Fire Department personnel not certified as a Fire Inspector by the State of New Jersey can conduct inspection of non-life hazards uses and conduct preplan inspections at the direction of the Company Officer

ADMINISTRATION & RESPONSIBILITY

1. The Local Enforcing Agency (L.E.A.) known as the Jackson Township Bureau of Fire Safety District No. 1 * 2 * 3 established by ordinance by the Board of Fire Commissioners to enforce the Uniform Fire Safety Act and the codes and regulations adopted pursuant thereto in all buildings, structures and premises within Jackson Township Fire District No. 1 * 2 * 3, other than owner occupied one and two family dwellings, and shall faithfully comply with the requirements of the code.
